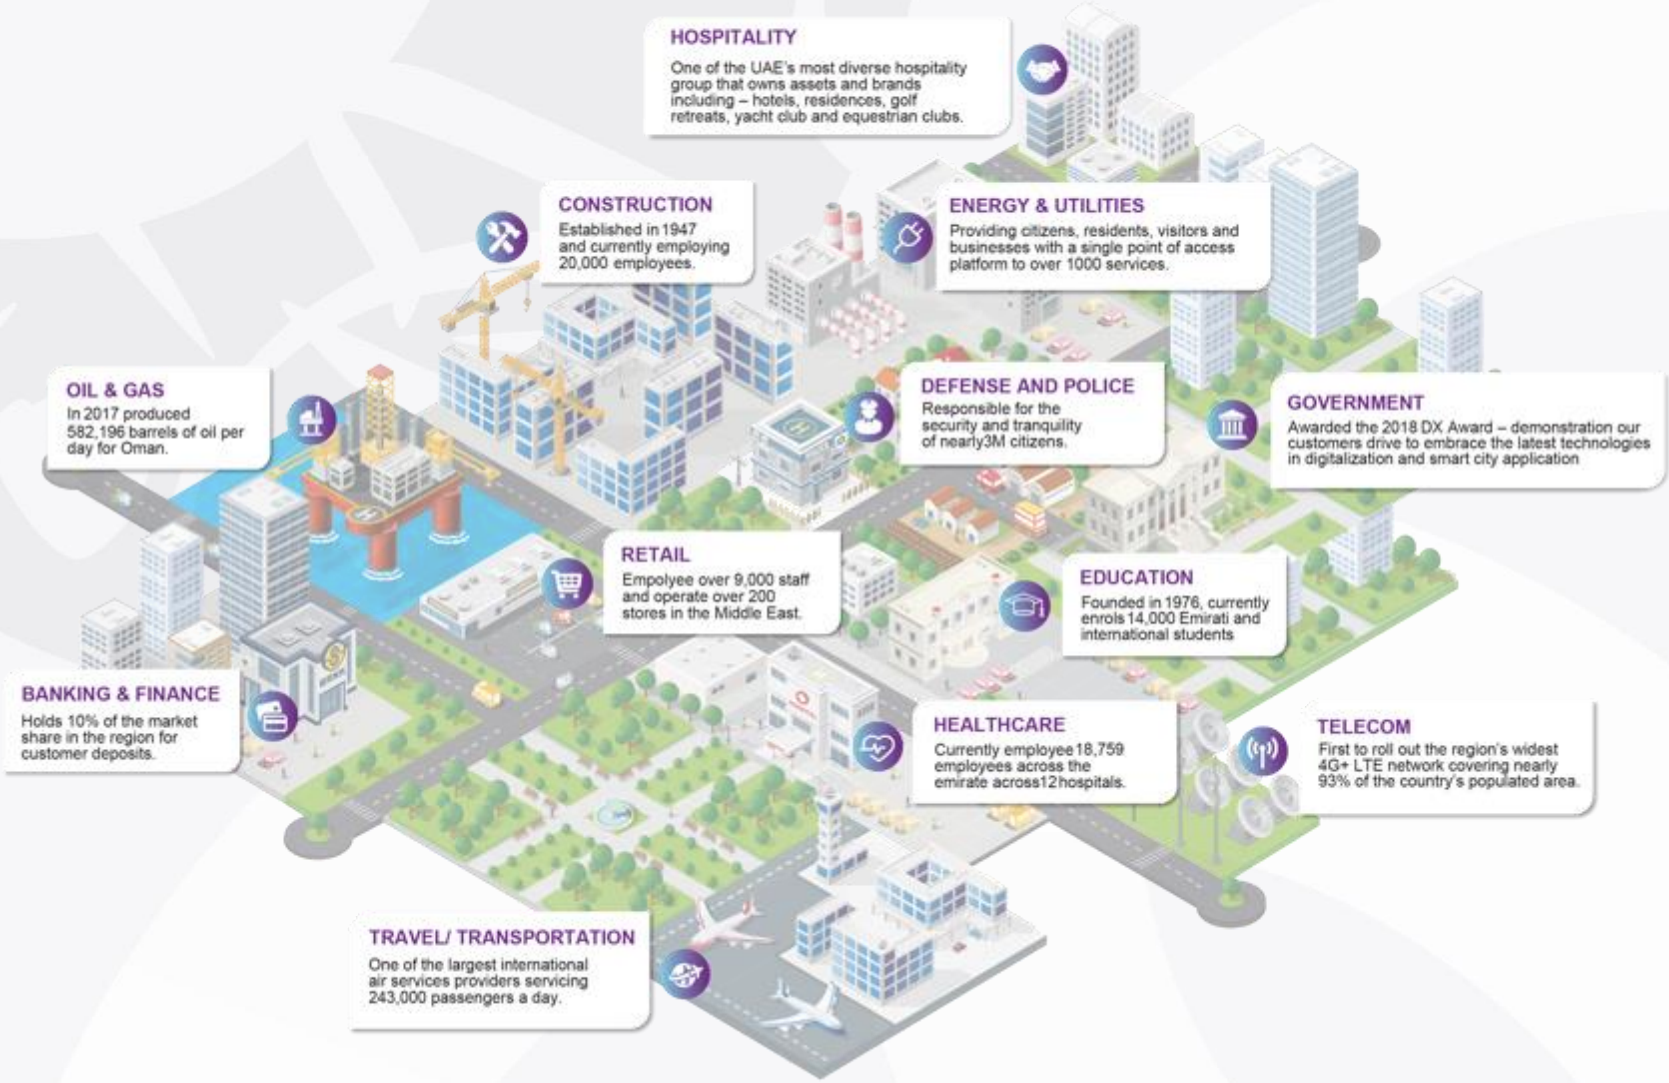
OUR CUSTOMERS

As a leading Hybrid Cloud & Digital Solutions provider, we support organizations of all sizes and industries on their journey to digital transformation. We serve over +2000 customers in 7 Countries across the region.



TECHNOLOGY SOLUTIONS

Data & AI

Empowering businesses to foster innovation, elevate customer experiences and enhance operational efficiency by harnessing data-driven insights. GBM offers data & AI solutions that helps our customers with their data maturity journey, and integrate AI into their business, while ensuring seamless alignment between organizational objectives and the ever-evolving data landscape.

IBM Infrastructure for Enterprise

Leveraging IBM Infrastructure solutions is integral for driving IT reliability and ensuring robust technological foundations that are environmentally and economically sustainable. These solutions integrate cutting-edge technologies to enhance operational resilience and elevate overall infrastructure performance.

Digital Automation

Enhancing operational excellence is pivotal in fostering the adoption of the Digital Economy, ensuring a comprehensive integration of advanced technologies and methodologies across various facets of organizational operations and processes.

Enterprise Applications

Maximizing organizational efficiency and fostering innovation are essential through the effective deployment of enterprise applications. These solutions offer a comprehensive framework, seamlessly incorporating advanced technologies that elevate customer experience and overall capabilities across diverse aspects of the business landscape.

CLOUD INFRASTRUCTURE SOLUTIONS

SDDC

Accelerate business transformation with GBM's innovative hybrid cloud solution portfolio. Experience rapid deployment, centralized management and cost-effectiveness; embrace a future-ready and automated digital infrastructure for future your applications and services.

Hybrid Workspace

Revitalize your work environment and customer experience with GBM’s comprehensive digital workplace solution. Enhance productivity, inspire innovation and empower people to engage seamlessly from anywhere across any device using our AI based collaboration and intelligent workspace solutions.

Networking

Advance your organization's digital landscape with secure and scalable Networking Solutions. Employ innovative strategies such as intent-based networking, software-defined access and software defined WAN, Wireless, Mobility, and Location-based analytics to stay ahead in the competitive arena and build a solid foundation for your digital transformation journey.

Site Services

Data center is crucial for digital business success. Our certified engineers and global partnerships enable dependable innovation for state-of-the-art data center facility. We can help you plan, design, build, support and manage a data center that meets your greatest challenges.

MANAGED SERVICES & LIFECYCLE SUPPORT

Stability & Support

GBM supports your business and IT operations with commitment on results and on Service Levels. Our service leverages processes, tools and continuous improvement to ensure proactive support and fast resolution of IT and End User issues.

Business Continuity & Disaster Recovery

Our services can help business implement and maintain business continuity and disaster recovery strategies by focusing on RPO, RTO and by ensuring that regular failover tests are performed.

Efficiency & Cost savings

By identifying our client needs, proposing the right model, and developing solutions based on best practices, innovation, and automation, GBM can provide high quality services at committed competitive prices, ensuring that continuous improvements generate further savings over time.

Control Management

By deploying monitoring, management and administration processes and techniques, GBM can ensure the secure operations and audit compliance. Moreover, asset management and management dashboards provide higher levels of security and control.

+95% Consistent Delighted Customers
